PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Data Science, with a solid foundation in data structures, algorithms, and object-oriented programming. Proficient in C++, C, Python, HTML, CSS, and JavaScript. Hands-on experience developing web applications and consistently sharpening problem-solving skills through platforms such as LeetCode and HackerRank. Deeply interested in Artificial Intelligence, Machine Learning, and full-stack development, with a track record of applying coursework to practical personal projects.

EDUCATION

B.Tech in Computer Science & Engineering (Data Science)

ABES Engineering College | Ghaziabad, Uttar Pradesh | CGPA: 8.16 | 2024 – 2028 (Expected)

Relevant Coursework: Data Science · Full Stack Development · Data Structures & Algorithms · Machine Learning

TECHNICAL SKILLS

Programming Languages: C++, C, Python

Web Technologies: HTML, CSS, JavaScript

Core Concepts: Data Structures & Algorithms (DSA)

Areas of Interest: Artificial Intelligence, Machine Learning

EXPERIENCE

Independent Developer | Self-Directed Learning

2024 – Present

- Solved algorithmic problems on LeetCode and HackerRank to strengthen proficiency in data structures, algorithms, and problem-solving under constraints.
- Applied programming fundamentals in personal practice exercises, focusing on writing clean, structured, and efficient code in C++ and Python.
- Built small-scale web projects to reinforce understanding of front-end development workflows, debugging techniques, and UI design principles.

PROJECTS

Bus Tracking System

Technologies: HTML, CSS, JavaScript

- Developed a web-based interface to display real-time bus locations and route information, improving passenger navigation and convenience.
- Designed an intuitive, responsive UI with dynamic location updates, enhancing tracking accuracy and overall user experience.
